

Product Name :
Sand Equivalent Test Set

Product Code :
ENGLABINGCAG440030

Description :

Sand Equivalent Test Set

Technical Specification :

All items are housed in the plastic carrying case except the Siphon assembly with Stock solution bottle which are packed separately.

two sets comprises: four measuring cylinders, two rubber stoppers, measuring can, irrigator tube, siphon assembly with bottle, weighted foot, funnel, graduated rule, 1 liter of stock solution (packed separately) and plastic carrying case.

For a reliable test result we recommend the use of a mechanical shaker.

Case dimension: 500x400x130 mm

Total weight approx.: 7 kg

The two sets are identical except for the four measuring cylinders which are totally graduated in the version and for the weighted foot which is slightly different.
