

**Product Name :**  
Soil Augers

**Product Code :**  
ENGLABINGCAG400061

**Description :**

Soil Augers

**Technical Specification :**

Sand Augers are designed for sampling looser, granular soils and have closed bits to retain cuttings. They are available in 3in (76mm) and 4in (102mm) diameters.

Standard Soil Augers are used for sampling most soil types, have an open bit design, and are available in 3in (76mm) and 4in (102mm) diameters.

Clay Augers have an open bit design and work well for sampling cohesive soils. Available in 3in (76mm) and 4in (102mm) diameters.

Mud (Dutch) Augers are best-suited for sampling muck-like, boggy, and root-bound soils. They have a T-handle and steel construction that allows penetration into sampling tougher soils.

Quick-Connect Auger Adapter edu scope is required to connect augers and older-model extensions with threaded connections to quick-connect components.

Quick-Connect Pins are required for connecting Augers and Extensions in quick-connect configurations.

Handles and Extensions connect to augers and help achieve greater depth penetration into the soil. They range in length from 2 to 5ft (610 to 1,524mm). Handles have a T-design to help easily guide the extensions deeper.

This auger an open design and is available only in 3in (76mm) diameter.

One-Piece Soil Samplers are available with 11in (279mm) or 14in (360mm) lengths.
