

Product Name :
Buoyancy Balance

Product Code :
ENGLABINGCAG3600041

Description :

Buoyancy Balance

Technical Specification :

A mechanical lifting device is used to raise the water tank through the frame height immersing the specimen suspended below the balance fixed on a cradle.
The buoyancy balance system developed by us consists of a rigid support frame.
Incorporating a water tank mounted on a platform.
The sample is weighed in air and in water to calculate the density of fresh concrete.
The balance may also be used as a standard weighting device, thus providing a versatile and comprehensive weighing system in the laboratory.
