### Product Name : Compound Pendulum

#### Product Code : ENGLABINGCAG2900007

#### Description :

**Compound Pendulum** 

## **Technical Specification :**

The apparatus is designed to study the time period and frequency of compound pendulum. The unit consists of a metallic rod on which metallic balls are fitted on different locations. A pendulum consists of a cord which has mass at its one end and it is tied to a pivot point on the other end. The rod is pivoted at any desired point.
