Product Name:

Computerized Thermal Conductivity of Powder

Product Code: ENGLABINGCAG3300008

Description:

Computerized Thermal Conductivity of Powder

Technical Specification:

FEATURES:

Determination of thermal conductivities k for different powder at different temperatures

Thermal conductivity of insulating powder can be calculated.

Ideal for group studies & demonstration.

Panelized instruments mounted on a control panel.

Easy to operate.

Useful for institutions, research laboratories & insulating powder manufactures

Functions of the software: educational software, data acquisition, system operation

SPECIFICATION:

Insulating powder Asbestos magnesia commercially available powder and packed between the two spheres.

Radius of the inner copper sphere: 50mm Radius of the outer copper sphere: 100 mm

Heater Mica Type: Heating power: 350W

Temperature limitation: 95°C

Measuring ranges:

Temperature: 2x 0...325°C Heating power: 0...450W

Required for Operation: 230V, 50Hz, 1 phase

230V, 60Hz, 1 phase; 120V, 60Hz, 1 phase

Engineering Lab Equipment India

2/2
