

Product Name :
Mortar Mixer Machine

Product Code :
ENGLABINGCAG3900042

Description :

Mortar Mixer Machine

Technical Specification :

The mortar mixing apparatus allows assessing the material attributes for the purpose of determining the strength, consistency and setting time of the mix.

The product is designed to develop samples of desired characteristics and offers twin churning and mixing functions long the planar and revolving dimensions.

There is a 6 liters bowl at the lower end that serves sufficiently for the sampling purposes.

The speed can be modulated in the range of 140 – 285 RPM (revolving) and 62 – 125 RPM (planar) to achieve the demanded consistency of the mortar mixture.
