

Product Name :
Lighting Training Board Simulator

Product Code :
ENGLABINGCAG350020

Description :

Lighting Training Board Simulator

Technical Specification :

FEATURES:

- Ability to measure electrical signal parameters of system component;
- Control unit diagnosis
- Reading/erasing fault codes
- Diagnosis through OBD 16-pin diagnostic connector
- Displaying the operating system parameters (live data)
- Activating the actuators (Depends on the control unit)

SPECIFICATIONS:

- Adjustable beam levels with the motors of front headlights
- Fully functional lighting training system is installed in a mobile aluminum frame.
- Electric wiring diagram with built – in banana plug jumpers for measurements and connecting or disconnecting the components
- Possible adjustments training with the headlight tester (optional)
- Electronic control unit (ECU) identification;
- 12 V battery
- 220/12 V Power supply unit
- Automotive oscilloscope
