

Product Name :
Anemometer

Product Code :
ENGLABINGCAG2600016

Description :

Anemometer

Technical Specification :

FEATURES:

- Vane anemometer with simultaneous display of Air Flow or Air Velocity, plus Ambient Temperature
- Calculates air volume in CFM or CMM
- Features data hold and min/max/avg functions
- Easy to set area dimensions are stored in the meter's internal memory for the next power on
- The Vane Anemometer has 8 memory locations for CFM and 8 for CMM for storing commonly used area sizes
- 20 point average for Air Flow
- 3% velocity accuracy via low friction 2.83 in (72 mm) diameter ball bearing vane wheel on 3.9 ft (120 cm) cable.

SPECIFICATION:

- This meter is a digital anemometer for measuring the ambient temperature, humidity, dew point Temperature, wet bulb temperature, wind speed, and air volume.
- This meter is a portable, professional measuring Instrument with large-screen LCD and backlight, Multi-unit switching functions.
- This meter has the functions of reading hold, maximum, minimum, etc.
- This meter can be used for hand-held or fixed Measurement.

Anemometer from India for Engineering Lab
