

**Product Name :**  
Water Bath (6 Holes)

**Product Code :**  
ENGLABINGCAG4500083

**Description :**

Water Bath (6 Holes)

**Technical Specification :**

Our boiling water baths come in rectangular shape and engineered to meet most demanding needs of heated applications.  
We make 3 models that are available in 4 (four), 6 (six) and 12 (twelve) holes.  
These water baths are constructed with 304 stainless steel for inner chamber; exterior using powder coated GI sheet.  
Temperature range is Ambient +5°C to 100°C, which is controlled through thermostatic regulator.  
Temperature can be seen on LED display.  
External and internal surfaces feature corrosion resistance property and also easy to wipe and clean after use.  
These units also have load indicators which indicate running status of machines.  
Water drain nozzle is fitted at back side of the machines.
