

Product Name :
Training Station for Multi Process Regulation

Product Code :
ENGLABINGCAG480010

Description :

Training Station for Multi Process Regulation

Technical Specification :

Contains a selection of level, flow, pressure, temperature and PH sensors and indicators
Primary and secondary flow controlled by linear motorised control valves
On/Off and proportional control P, PI and full PID control with autotune facility
Can perform dual loop cascade control
Water used as the process fluid
