

Product Name :
Automatic System to Operate Industrial Process

Product Code :
ENGLABINGCAG4800013

Description :

Automatic System to Operate Industrial Process

Technical Specification :

Training platform structure takes aluminum structure, with four universal wheels under the end of workbench, with two lockers on two wheel, it's flexible to move and stop. Various execute mechanism module is installed in aluminum base panel, it's easy to operate, safety and reliable.

PLC control unit is installed in training workbench, it's easy to operate, safety and reliable.

This training system combines mechanical technology(include pneumatic technology), sensor technology, PLC control and communication technology. Students will learn the modern manufacturing technology through this training platform. The whole structure is open structure, it's easy to assembly and disassembly, you can change training module easily, it's suitable for teaching or technical skills competition.

This training set connect PLC module I/O interface, various indicator switch, photoelectric switch, sensor, indicator components through terminal strip from main station to substation.
