Product Name:

Hybrid Solar and Wind Energy Trainer

Product Code:
ENGLABINGCAG4900007

Description:

Hybrid Solar and Wind Energy Trainer

Technical Specification:

The Trainer is composed of two sub-systems, one for the generation of electric energy from solar photovoltaic energy through a solar panel and the other for the generation of electric energy from wind energy through a wind turbine.

In this trainer, one of the two inverters, acting as master, synchronizes the frequency of the second inverter, acting as slave, to allow creating a connection between the two outputs that operate as a single line with double available power.
