

**Product Name :**  
Power System Protection Training System

**Product Code :**  
ENGLABINGCAG5000004

**Technical Specification :**

The proposed power system protection should be able to cover the following laboratory module topics related to power system protection

- Symmetric and asymmetric fault analysis
- Operation and stability of different relays
- Distance protection
- Numerical relay
- Undercurrent/Overcurrent
- Undervoltage/Overvoltage
- Synchronization check
- below frequency/above frequency
- phase balance, phase sequence
- Reverse power
- Power factor
