

**Product Name :**  
Pumps Learning Systems

**Product Code :**  
ENGLABINGCAG500011

**Description :**

Pumps Learning Systems

**Technical Specification :**

Sturdy, yet flexible design integrating components that meet industrial safety standards and fit many different training needs.

Comprehensive curriculum consisting of fully illustrated student manuals containing job sheets and/or work orders

13 different types of industrial pumps (vane, flexible impeller, progressive cavity, peristaltic, pneumatic diaphragm, etc.)

Provides safe, hands-on industrial pumps training

Wide-range of industrial-grade components

Pumps can be dismantled and transparent pump cover allows cavitation observation

Configure variable speed drives using local panels or a software

Fault-insertion by the instructors

Latest three-phase ac drive included to vary the speed of motor-driven pumps

Easy electrical connections between the drive and motor can be made using banana jacks or terminal blocks
