

Product Name :
Electromechanical Working Bench

Product Code :
ENGLABINGCAG500024

Description :

Electromechanical Working Bench

Technical Specification :

The training device adopts an aluminum column frame structure, and the power supply is integrated and installed.
The unit circuit hanging box is fully configured and can be used in combination to complete the training content of various courses.
The relevant units can be flexibly added to or deleted from the experimental subjects to meet the needs of different users.
The device has a good safety protection system.
