

Product Name :
High Speed Directional Pulse Hole Metallizing

Product Code :
ENGLABINGCAG5200008

Description :

High Speed Directional Pulse Hole Metallizing

Technical Specification :

Fully ABS engineer plastic machine body and inner groove, with antiseptic, thermo stability, technology flow is beautiful. Environment protection black hole technology flow application, No pollution, it can direct discharge. Cathode oscillation technology, prevent , concentration gradient, add hole inner liquid flowability.

Technical specification:

With 4 groove structure, with acid-washing, soak conducting resin, activate, electroplating function. Use transparent flip function, it is easy to observe and storage. Maximum board: 400x400mm, it can electroplating boards at the same time.
