

Product Name :
Training Model PLC Lab

Product Code :
ENGLABINGCAG500033

Description :

Training Model PLC Lab

Technical Specification :

Input and output of the PLC module All the terminals are led out to the panel through the adapter terminal, and connected using the K2 test line.

The experimental circuit and device are fully equipped and can be used in combination to complete the training content of various courses.

PLC module selects module, provides digital 14 input, 10 transistor (DC24V) output, 2 analog input, 2 analog output.

The PLC input can simulate the digital input state through the switch operation.

The USB-PPI programming cable is connected to the computer.

The training platform has a good security protection system.
