

Product Name :
PLC with Network Communication Training Workbench

Product Code :
ENGLABINGCAG500037

Description :

PLC with Network Communication Training Workbench

Technical Specification :

The training platform adopts an aluminum column frame structure. The bottom of the training platform is equipped with universal wheels, which can be flexibly moved. Various modules are placed on the panel, which is easy to use and not easily damaged.

The communication module is complete and can be used in combination in various ways.

The overall structure is open and removable, which can easily replace modules. The module content is determined according to the principles of productive functions and integrated learning functions, so that the required modules can be conveniently selected during teaching or competition.

The training and assessment device is a low-voltage component, which is safe to use.

PLC with Network Communication Training Workbench Lab Equipment Electrical Laboratory Equipment for University
