

Product Name :
Advanced Rail Control Circuit

Product Code :
ENGLABINGCAG5000050

Description :

Advanced Rail Control Circuit

Technical Specification :

This product according to the field application, combined with the practical teaching characteristics, the cabinet to structure, three parts of control circuit integration to a cabinet put oneself in another's position realize speed rail circuit all function at the same time, still constitute the electrical concentrated complete electrical combination circuit, can let students to rail control circuit have a whole understanding, grasps the rail control electric circuit principle of work, skilled carry on related circuit of the lap and troubleshooting. Master electrical combination is learning the necessary foundation electric.
