

Product Name :
Programmable Logic Controller Experiment Box

Product Code :
ENGLABINGCAG500063

Description :

Programmable Logic Controller Experiment Box

Technical Specification :

The product consists of a training model and a PLC module with a modular design. The test box is made of thick aluminum alloy frame and epoxy resin board, which has high compressive strength and good insulation performance. The test box uses an integrated design to reduce the size and weight of the device for easy movement. All instruments use digital display instruments, which can more easily and accurately obtain experimental data and complete experiments.

Input power: 220V±10% 50Hz
