

Product Name :
Micro Controller Trainer

Product Code :
ENGLABINGCAG5000078

Description :

Micro Controller Trainer

Technical Specification :

Practical training device for 8051 single-chip microcomputer (n.b.8085 is the equipment standard, not the company model)
Help understand embedded systems (including commissioning, testing and training)
LED display control, Dot matrix LED control sleep motor control, input port expansion pulse
Counter, speak or control
Communication 7 segment display
Control output port inflation photo interrupt control, timer/counter, LCM display control RO RQUIVALENT
Provide test box, test circuit board, test accessories, instruction manual, etc.
