

Product Name :
Training Bench for Selectivity

Product Code :
ENGLABINGCAG500090

Description :

Training Bench for Selectivity

Technical Specification :

Adjustable differential relay cognition experiment
Analyze the cause and effect of short circuit (experiment calculation model and protection selection)
Study the principle experiment of magnetic heat circuit breaker (release curve, release power)
Analysis of the difference between protection of the ascending and the protection of the downside
Simulate all solution of selectivity (total, partial and non-selectivity)
Select the impedance experiment of the fault circuit through the modularized inductance structure
Restrict short circuit current experiment
Selective experiment of measuring current (at least 5 magnetic circuit breakers with different curves)
Use adjustable differential relay
