

**Product Name :**  
Training Bench for Selectivity

**Product Code :**  
ENGLABINGCAG500090

**Description :**

Training Bench for Selectivity

**Technical Specification :**

Adjustable differential relay cognition experiment  
Analyze the cause and effect of short circuit (experiment calculation model and protection selection)  
Study the principle experiment of magnetic heat circuit breaker (release curve, release power)  
Analysis of the difference between protection of the ascending and the protection of the downside  
Simulate all solution of selectivity (total, partial and non-selectivity)  
Select the impedance experiment of the fault circuit through the modularized inductance structure  
Restrict short circuit current experiment  
Selective experiment of measuring current (at least 5 magnetic circuit breakers with different curves)  
Use adjustable differential relay
