

Product Name :
AC Circuit Output Module

Product Code :
ENGLABINGCAG500110

Description :

AC Circuit Output Module

Technical Specification :

AC380V total power supply ---- -4p leakage circuit breaker.

AC42V/8A power supply -- -2p circuit breaker.

Three phase indicator light.

Three-phase insurance

Three-phase five-wire output terminal.

AC42V/8A output terminals and insurance.

AC42V/8A output terminals and insurance.

AC42V/8A output indicator light.

Ac voltmeter --AC500V.

Commutation switch

Ac ammeter -AC8A.

AC500V voltmeter measuring control switch (note: set to the left side, with the use of reversing switch, the internal three-phase power supply can be tested; To the right, use the test line to test the voltage of the external output terminal.

Engineering Lab Equipment India
