

Product Name :
Digital Electronics Trainer Kit

Product Code :
ENGLABINGCAG5000115

Description :

Digital Electronics Trainer Kit

Technical Specification :

Power supply: ac input: 220 v + 10%, 50 Hz

Dc output: + 12 v / 300 ma, 5 v / 3 a rostrum are automatic protection function

Manual single pulse circuit of two groups: each group can output plus or minus two pulses at the same time, pulse amplitude for TTL level.

Function signal generator can be output: square wave, sine wave, triangular wave. Can reach 0 and 1 m continuous adjustable; Fixed frequency pulse source no.6:1 Hz, 10 Hz and 100 Hz, 1 KHz, 10 KHz, 100 KHz; (composed of CPLD chip)

Six high accuracy digital frequency meter, measuring range: 0-9.9999 MHz error Logic level input and display:
