

Product Name :
Demonstration Panel for The Electric Testing Carried out in a Building

Product Code :
ENGLABINGCAG5000145

Description :

Demonstration Panel for The Electric Testing Carried out in a Building

Technical Specification :

Framework is made of sheet steel chemically treated and painted with several coats of epoxy varnish; its base is provided with rubber feet and it can be positioned on a working top.

All the necessary electric components for the correct power supply of circuits are included in the panel.

Main components installed:

1 single-phase isolation transformer 230 V / 230 V 230 VA

2 simulators of earth plate with resistors of 2 Ω , 20 Ω , 200 Ω , 2 k Ω

1 simulators of resistance of protection conductor with resistors of 0.1 Ω , 1 Ω

1 simulator of extraneous conducting part with resistances of 200 Ω , 1000 Ω , 5000 Ω

1 magnetothermal circuit breaker 2 x 2 A "C"

1 magnetothermal circuit breaker 2 x 1 A "C"

1 differential circuit breaker 2 x 1.6 A "C" / 30 mA "AC"

1 magnetothermal and differential circuit breaker 2x25 A/30 mA "A"

1 protection and control switch - 2P +Earth

Two 2-pin sockets - 10/16 A, 2P + Earth

2 simulators of isolation earth fault in power consuming

Device with resistors of 50 k Ω , 15 k Ω , 5 k Ω , 1500 Ω , 500 Ω ,

and bolted fault

Engineering Lab Equipment India
