

**Product Name :**  
Analogue Electronics Experiment Kit

**Product Code :**  
ENGLABINGCAG500152

**Description :**

Analogue Electronics Experiment Kit

**Technical Specification :**

Power supply: input: AC 220V $\pm$ 10%,50HZ

Output: DC: - 5V~-12Vadjustable, I?0.2A

DC: +5V~+27Vadjustable ,DC I?0.2A

DC:  $\pm$ 12V,+5V,DC I?0.2A

The above circuit have overcurrent protection, self-recovery function

AC V:7.5V $\times$ 2;AC I?0.15A

Adjustable DC signal source:

Twin channel-0.5V~+0.5V, -5V~+5V two gear continuously adjustable.

Low frequency signal source: 2HZ-20KHZ 0-10V(newly increased)
