

Product Name :
Neutral Trainer Industrial

Product Code :
ENGLABINGCAG5000167

Description :

Neutral Trainer Industrial

Technical Specification :

The simulation of faults (insulation faults with the possibility of changing the insulation resistance and the contact resistance)

The study of the influence of the quality of grounded outlet,

The simulation of the faults of a short-circuit: (between phase and neutral, between two phase) as well as the simulation of the first and second fault (case of regimes TN and IT)

The highlighting of selectivities and chronometric

Ammeter,

The highlighting of reasons of decrees, regulations and standards in force on the protection of persons in the regimes TN, TT, and IT

Power Supply : by three-phase network:

400V 50Hz

Power: minimum 2KVA
