

Product Name :
Electrical Engineering Lab

Product Code :
ENGLABINGCAG5000168

Description :

Electrical Engineering Lab

Technical Specification :

Industrial system allowing for maintenance interventions (adjustment of the detectors, audits of the terminals of the motors etc.) (to be specified by the bidder)
Operating Unit of automatism functional
Batch WAT (verification of absence of voltage) and personal protection equipment (PPE) (to be specified by the bidder)
Multimeter (VAT), apparatus for logging, markup, tooling and EPI(gloves, face visor etc.) for the implementation of interventions in the observance of safety standards
Protective glove for electrician 500V medium 1 pair
Protective goggles electrician 1 set
