

Product Name :
Microwave Antenna Lab Kit

Product Code :
ENGLABINGCAG5000200

Description :

Microwave Antenna Lab Kit

Technical Specification :

The microwave and antenna integrated experimental platform series is based on the characteristics of microwave teaching, combined with specific circuits, leading students to understand the principles of the microwave from shallow to deep, and then to the index test and design development. The hardware of the experimental system is mainly composed of a signaling experiment box, a receiving experiment box and a passive module experiment box.
