

**Product Name :**  
Automatic Tracking Motion Control System

**Product Code :**  
ENGLABINGCAG5000218

**Description :**

Automatic Tracking Motion Control System

**Technical Specification :**

The training platform adopts aluminum profile column frame structure, all control devices are open integrated installation, the bottom is equipped with universal wheels, each unit is flexible, easy to use, and not easy to damage.

The experimental circuits and devices are fully equipped and can be used in combination to complete the training content of various courses.

The training platform has a good safety protection system.
