

Product Name :
Stepper Motor Trainer

Product Code :
ENGLABINGCAG5000239

Description :

Stepper Motor Trainer

Technical Specification :

The stepper motor unit stands independently with its own power input to simulate the frequency of the stepper motor.

The training package based on the most modern electrical drive technology. It teaches all of the skills needed to use electrical drives and information on their particular features and advantages.

Learning Objectives

Constructing a stepper motor system

Testing and commissioning a stepper drive

Multiple speed controls of stepper motor
