

Product Name :
Bench Pressure Sensors Regulated Version Elevator

Product Code :
ENGLABINGCAG5100044

Description :

Bench Pressure Sensors Regulated VersioAn Elevator

Technical Specification :

The picture is only for reference
Minimum required characteristics:
Objectives: Understanding of the different pressures measured
Absolute pressure / Relative pressure / Differential pressure
Study and comparison of different sensor technologies
pressure
Study of a pressure regulation loop
Main Features
Compressed air supply with regulator.
Air regulator with isolation valve.
Differential pressure transmitter with 4-20 mA feedback
on safety data sheets. Assembled with two valves
isolation valve and a balancing valve (manifold system).
Stainless steel compression enclosure.
Relative pressure 4-20 mA transmitter and valve
isolation.

Engineering Lab Equipment India
