

Product Name :
Basic Pneumatic Training Workbench

Product Code :
ENGLABINGCAG5100050

Description :

Basic Pneumatic Training Workbench

Technical Specification :

Workbench has 4 wheels, it is suitable for move and installation. 2 wheels can be lockable. It use aluminum panel, the distance for slot is 25mm, there is quickly plug in and plug out sockets under components, students can plug components on aluminum panel easily.

Every pneumatic component is an individual module, it has quickly plug in and plug out sockets, can put in aluminum panel and build pneumatic circuit.

Use stainless air compressor, running has low noise, it supply good environment for training.

Pneumatic circuit use quickly plug in and plug out leads, it is suitable for students to build pneumatic circuit.

Students can combine theory to practice, and practice hand on ability.
