

Product Name :
Tensile Testing Machine

Product Code :
ENGLABINGCAG5100057

Description :

Tensile Testing Machine

Technical Specification :

The fuel tank under the home, double column, anti-power rack to set the host structure.
The manual hydraulic pump as a power source.
20 kN small plunger hydraulic cylinder structure, no leakage, low friction.
Precision pressure gauge indicates that the test force.
The dial gauge measurement of specimen deformation.
The threaded specimen holding device, smart and reliable.
The whole beautiful appearance, easy to operate.
