

**Product Name :**  
Electronic Fuel Injection

**Product Code :**  
ENGLABINGCAG660001

**Description :**

Electronic Fuel Injection

**Technical Specification :**

The Electronic Fuel Injection experiments covered by the panel are:  
Relationship between the duration of injector opening to the quantity of injected fuel  
Air temperature effect on the quantity of injected fuel  
Signal analysis with oscilloscope  
Injection time calculation with oscilloscope  
Injection time calculation with tachometer and dwell meter  
Valve position switch output signals  
Valve position sensor output signals  
Study of injector activation signal at various conditions  
Injection duration at various speeds, temperatures and engine loads  
Oxygen sensor operation
