**Product Name :**  
MOT Control of a DC Motor

**Product Code :**  
ENGLABINGCAG800001

**Description :**

MOT Control of a DC Motor

**Technical Specification :**

This laboratory is designed for the study of Control of a DC motor to allow the student a practical training, based on the performance of guided experiments. Industrial type components must be educationally adapted by using a modular panel system to permit the step by step assembling from the simplest circuit to the most complex system. This trainer has a modular structure and it consists of didactic panels installed on a vertical frame. It is supplied with a theoretical and practical manual. The modularity of this didactic system can give the students a direct and immediate approach to the topics, offering the opportunity to study various subjects, performing several experiments as following:

P, PI and PID controls of the speed of a DC motor using the CHR method  
Control of a DC generator

**Engineering Lab Equipment India**
