Product Name : Deadweight Tester

Product Code : ENGLABINGCAG870000

Description :

Deadweight Tester

Technical Specification :

A simple deadweight tester with weights and a bourdon tube pressure gauge with a clear front allowing the mechanism to be viewed. Unique design allows standard Newton weights to be used; hence reinforcing the student understanding of pressure being Force / Unit Area. The unit has an optional pressure transducer available allowing the concept of electronic representation of pressure to be investigated.
