

Product Name :
Cable Winch

Product Code :
ENGLABINGCAG6000016

Description :

Cable Winch

Technical Specification :

"Cable or hoist winches are machine elements that are classified as transmission or conversion elements. This allows loads secured to the supporting cable to be moved. In a cable winch, a supporting cable is wound on a cable drum by means of a gear transmission.

Features:

Structure and principle of a cable winch.

Learning Objectives And Experiments:

- Determine
- Angular velocity
- Efficiency
- Behaviour under load
- Transmission ratio
- Unwinding rate."

Engineering Lab Equipment India
