**Product Name :**Creep Rupture Test

Product Code: ENGLABINGCAG6000019

## **Description:**

Creep Rupture Test

## **Technical Specification:**

"The creep rupture test is a destructive test method for determining the material behaviour (creep) at constant test temperature (room temperature and below) and after prolonged exposure to a constant load. Components that are subjected to long-term constant loads deform plastically.

This material behaviour is called creep.

## Features:

Experiments at or below room temperature are possible

Typical phenomena of creep processes

Learning Objectives And Experiments: Influence of temperature and load on the creep Creep in specimens of various materials Record a straintime diagram (creep curve)

Load and recovery in plastics."

## **Engineering Lab Equipment India**
