

**Product Name :**  
Elastic Shaft Kit

**Product Code :**  
ENGLABINGCAG6000032

**Description :**

Elastic Shaft Kit

**Technical Specification :**

"This accessory set-up enables the response of an elastic rotor to unbalanced excitation to be studied. The field balancing of elastic rotors is another area which can be investigated. The supplied pendulum ball bearings ensure full mobility of the shaft. The subcritical, supercritical and resonance running states can be demonstrated. A comparison of the orbits (path curves) in the subcritical and supercritical range is of particular interest. The retainer bearing limits the amplitudes to harmless values at speeds close to resonance.

**Specification:**

- Investigation of flexural vibration of an elastic shaft
- Bearing blocks and retainer bearing with bores for sensor mounting
- Stainless steel elastic shaft
- 1 Retainer bearing
- 2 Bearing blocks with pendulum ball bearing
- Stackable box for all components
- Accessory set for machinery diagnostic training system

**Technical Data:**

Elastic shaft  
Length: 530mm

---

Min. diameter: D=10mm  
Nominal length between bearings: 450mm  
Diameter at bearings: D=20mm  
Dimensions and Weight of Elastic Shaft Kit  
l x w x h: 600x400x120mm (box)  
Weight: approx. 6kg."
