

Product Name :
Drinking Water Installation Demonstrator

Product Code :
ENGLABINGCAG790006

Description :

Drinking Water Installation Demonstrator

Technical Specification :

Function and operation of components
Water meter
Pressure reducing valve with and without
Reversible flow filter
Backflow preventer / system separator
System of safety devices
Pressure vessel with heater
Circulating pump
Thermal discharge safety device

Familiarization with the most important components in a drinking water installation
System divided into cold water side, hot water side, drain system
Cold water circuit with water meter, pressure reducing valve, angle-seat valve, system separator, outlets
Hot water circuit with system of safety devices, pressure vessel with heater, pressure reducing valve, non-return valve, circulating pump with timer, outlets
Drain system on rear of panel, drain pipe with high temperature stability single handle mixer, two handle mixer, shower sprinkler, pipe vents

Engineering Lab Equipment India
