

Product Name :
Free and Forced Convection

Product Code :
ENGLABINGCAG7900008

Description :

Free and Forced Convection

Technical Specification :

Free and forced convection
Calculation of convective heat transfer at different geometries
Flat plate
Cylinder
Tube bundle
Experimental determination of the Nusselt number
Investigation of the relationship between flow formation and heat transfer during experiments
Description of transient heating process
Free and forced convection using the example of various heating elements
