## Product Name :

Heat Distribution And Control In Heating Systems

### Product Code : ENGLABINGCAG7900012

#### **Description**:

Heat Distribution And Control In Heating Systems

#### **Technical Specification :**

Design of a room heating system with controller and actuator

Temperature-led heating controller (outside temperature) with three-way mixing valve

Simulator for varying outside temperature

Function and design of a room heating system divided into sections

Hydronic balancing of heating circuits with multiple radiators

Function and design of commercially available heating technology components

Measurement of differential pressures, temperatures and flow rates

Energy calculation and evaluation of emitted heating capacity based on measured quantity of heat

Reading and comprehension of symbols and process schematics

Specification

Together with hot water generator: setup of a complete domestic heating system with 2 independent heating circuits

Heating circuit (A) with 1 subcircuit contains 2 flat radiators, 1 circulating pump, 1 heating controller with 3-way mixing valve and simulator for variation of outside temperature

Heating circuit (B) with 2 subcircuits contains 4 radiators, 1 circulating pump, 2 heating controllers, 2 solenoid valves

Flow control valves for hydronic balancing in heating circuit with 2 subcircuits measurement of flow rate and pressure

9 measuring points for differential pressure and temperature Hot water connections with quick-release couplings

# **Engineering Lab Equipment India**
