**Product Name:** 

Training System Temperature Control Experiment

Product Code:

ENGLABINGCAG810001:

## **Description:**

Training System Temperature Control Experiment

## **Technical Specification:**

Experimental unit for control engineering experiments

Temperature control of a heated metal bar

Heating and cooling by Peltier element

Temperature sensors at 3 different points along axis of bar to establish thermal lags

Software activated fan to generate disturbance variables

Software-based controlled system simulation

Process schematic on front panel

**Technical Data** 

Heated bar: DxL: 20x200mm, aluminium

Peltier element

power consumption depending on temperature

power at 300K: 38,2W power at 50°C: 44,3W operated by DC voltage

Fan

Power consumption: 2W

Max. flow rate: 40m/h

Temperature sensor: 0...100°C

Thermometer: 0...100°C

Temperature control range: 0...100°C
