Product Name :
Work Done By A Variable Force

Product Code :
ENGLABINGCAG8800007

Description :

Work Done By A Variable Force

Technical Specification :

The equipment consists of a pivoted arm carrying a weight at its end and kept in equilibrium by a spring balance at right angles to the arm by holding the free end of the spring balance on the angular position of the arm is indicated by an angular scale the arm pivot.

Features

- Low cost, effective teaching
- Self-contained
- Bench mounted
- Reinforces concepts of work and energy
- Direct reading of tangential effort
