

Product Name :
Reactions Of Beams Apparatus

Product Code :
ENGLABINGCAG880008

Description :

Reactions Of Beams Apparatus

Technical Specification :

Low cost, effective teaching
Self-contained.
Bench mounted.
Direct measurement of reactions by spring balances.
Loads and supports can be placed in any position.
Practical verification of equilibrium of vertical force or moments.
Simply supported beams or levers can be set up.

Range of Experiments of Reactions of Beams Apparatus
Experimental determination of the reaction forces in the supports of a simply supported beam under various loadings.
Measurement of loads and moments on a lever.
Comparison with calculated results and validation of the principle of equilibrium

Engineering Lab Equipment India
