Product Name :
Special Weight Length Minus Tolerance Measuring With High Precision Test Equipment

Product Code :
ENGLABINGCAG9700003

Description :

Special Weight Length Minus Tolerance Measuring With High Precision Test Equipment

Technical Specification :

Completely automatic measurement process. Place the component on the V-shaped bearing, press the measure button, and the measurement instrument will complete the measurement quickly. The measurement data are directly retrieved, displayed and saved by computer software.

Intuitive display of length and weight.

Support for saving, instant retrieving and inspecting measurement data.

Integrated with safety barriers, travel limit protection and full scale protection.

Safety barriers are installed at two sides of the working table to ensure the safety of operators.

Integrated with non-contact laser measurement, improving the precision and reliability of measurement data.

Specially developed measurement control system, featuring a high speed processing unit and a performance of high stability and precision.

Length measurement range: 2001500mm

Length measurement accuracy: 0.2mm

Weight measurement range: 0.330kg

Weight measurement accuracy: Less than 0.5% of total weight

Sample diameter range: 550mm

Power supply: 0.5kW/AC220V/50Hz

Frame dimensions: 21807201175mm3
