Product Name :
Hydraulic System Trainer

Product Code :
ENGLABINGCAG10300012

Description :

Hydraulic System Trainer

Technical Specification :

Fluid Reservoir

Rotary vane or gear hydraulic pump with electrically driven motor, powered by 110 volt AC/60 Hz or 220V AC/50 Hz

Aircraft hydraulic cylinder, sequenced by a sequencing valve.

Pressure Gauge

Check valve

4-way selector valve

Hand Pump

Filter Assembly

Pressure relief valve

Accumulator Assembly

Complete curriculum with schematics, and User / Training Manual

Large, laminated, colored schematic poster of system plumbing.

Engineering Lab Equipment India
