Product Name :
Well Bore Hydraulic Demonstrator

Product Code :
ENGLABINGCAG10400003

Description :

Well Bore Hydraulic Demonstrator

Technical Specification :

Throughout the well servicing and well production phases, the operator will create different flow patterns in the well-bore.

The operator has control over several aspects of the flow inside the well-bore; the flow direction fluid flow rates, and the distance that the tubing is above the bottom of the hole. The operator must balance these parameters to successfully achieve:

- Safe Drilling and Servicing Operations
- Containment of gas and liquid kicks
- Control liquid flow rates
- Positive control of well pressure
- Containment of hydrocarbon-contaminated water

- Specification of Well Bore Hydraulic Demonstrator
- Simulated water, liquid hydrocarbon and gaseous hydrocarbon streams
- Clear wellbore vessel 6 inches (150 mm) Diameter
- Integral storage vessels, separation equipment and blending unit.
- Translucent for visual monitoring
- Complete cart-mounted unit with integral support structure
